

YEAR 4

Time, Money and Measures

Three sections. Write money with two decimal places and always put the unit on a measurement.

Name: _____ Date: _____ Score: _____

A. Time

Sixty minutes in an hour, so adding can push you into the next one.

1 Something starts at 14:20 and lasts 45 minutes. What time does it finish?

2 Something starts at 09:50 and lasts 40 minutes. What time does it finish?

3 Something starts at 11:35 and lasts 55 minutes. What time does it finish?

4 Something starts at 16:45 and lasts 90 minutes. What time does it finish?

5 Something starts at 07:10 and lasts 25 minutes. What time does it finish?

6 How many minutes are there between 13:15 and 14:05?

7 How many minutes are there between 08:40 and 10:10?

8 How many minutes are there in 3 hours?

9 Write quarter past four in the afternoon using the 24 hour clock.

B. Money

Pounds and pence, two decimal places, every time.

- 1 A pen costs £1.20. What do 4 cost?
- 2 You pay with £10.00 for something costing £6.45. What is the change?
- 3 Three tickets cost £13.50 altogether. What does one cost?
- 4 A book is £7.99 and a pen is £2.50. What is the total?
- 5 You save £2.25 a week. How much after 8 weeks?
- 6 Five children share £20.00 equally. How much each?
- 7 A toy is £15.00 and is reduced by £3.75. What is the new price?

C. Measures

1000g in a kg, 1000ml in a litre, 100cm in a metre.

- 1 How many grams are there in 3 kilograms?
- 2 How many centimetres are there in 2.5 metres?
- 3 How many millilitres are there in 1.5 litres?
- 4 How many metres are there in 4.2 kilometres?
- 5 A jug holds 2 litres and 750ml is poured out. How much is left?
- 6 A plank is 3m long. A piece 140cm long is cut off. How much is left?
- 7 Four parcels each weigh 850g. What do they weigh altogether?

- 8 A bag of flour weighs 1.5kg. How many 250g portions can be made from it?
